DETAILED ACTION***Election/Restrictions***

Claims 2, 5, 8, 11, 14, 17, 20, 23, 26, 29, 32, 35, 38, 41, 44, 47, 50 and 89-103 are directed to an allowable product. Pursuant to the procedures set forth in MPEP § 821.04(B), claims 53-88, directed to the process of making an allowable product, previously withdrawn from consideration as a result of a restriction requirement, are hereby rejoined and fully examined for patentability under 37 CFR 1.104.

Because all claims previously withdrawn from consideration under 37 CFR 1.142 have been rejoined, **the restriction requirement as set forth in the Office action mailed on March 8th, 2003, is hereby withdrawn.** In view of the withdrawal of the restriction requirement as to the rejoined inventions, applicant(s) are advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once the restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

Allowable Subject Matter

Claims 2, 5, 8, 11, 14, 17, 20, 23, 26, 29, 32, 35, 38, 41, 44, 47, 50 and 53-103 are allowed.

The following is an examiner's statement of reasons for allowance: the prior art of record teaches many aspects of the light emitting apparatus and method of manufacturing the light emitting apparatus, including a first electrode formed on an insulating surface, a first insulating layer covering an end portion of the first electrode and having a tapered edge, an organic compound layer, and a second electrode formed on the organic compound layer, where the first electrode is not in direct contact with the organic compound layer.

However, the prior art of record neither teaches nor reasonably suggests the above combination with a second insulating layer that is formed on the first electrode and the first insulating layer, and where the organic compound layer is formed on the second insulating layer, as required by the combinations as claimed in each of claims 2, 5, 53-58 and 89.

Claims 8, 11, 14, 17, 20, 23, 26, 29, 32, 35, 38, 41, 44, 47, 50, 59-88 and 90-103 are allowed by virtue of their dependency.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
